

Wojciech Sychała

Senior QA Automation Engineer

📍 Szczecin, Poland ✉️ wspychala71@gmail.com ☎️ 694 515 715 🔗 wojciech-spychala

Summary

Senior QA Automation Engineer with professional experience across IT, maritime navigation equipment, electromobility and electronics, including more than 12 years of experience in software testing and quality assurance. Strong background in embedded systems, Linux environments, and industrial and maritime electronics. Experienced in test automation using Robot Framework and Python, CI/CD integration, and Agile/Scrum methodologies.

Skills

Test Automation: Robot Framework, Squish, Postman, Manual Testing

Programming & Scripting: Python, Bash, PHP, SQL

Infrastructure & DevOps: Linux, Docker, Kubernetes, Jenkins, Azure DevOps, Git

Protocols & Systems: OCPP, CAN, OPC, TCP/IP, SSH, Apache, MySQL

QA Practices & Tools: Agile/Scrum, Log Analysis, Jira, Technical Documentation

Languages: Polish (Native), English (C1/Fluent)

Experience

Cognizant, Senior QA Tester

Szczecin, Poland

- Designing, maintaining, and executing automated tests in Robot Framework with Python libraries for embedded systems (automation, e-mobility).
- Creating test scenarios and test cases.
- Validating communication via OCPP, CAN, OPC, and LAN protocols.
- Integrating automated tests into CI/CD pipelines using Azure DevOps and Jenkins.
- Analyzing logs, identifying defects, and supporting debugging processes.
- Developing automated regression tests executed as part of the software release process.
- Maintaining and extending a suite of automated test cases.
- Testing Linux-based embedded systems.
- Working in Agile/Scrum teams ranging from 6 to 80 members.

Feb 2025 – present

1 year 6 months

Mobica Limited Sp. z o.o., Software Engineer in Test

Mar 2019 – Feb 2025

- Performing functional testing for cloud-based applications and embedded device user interfaces.
- Creating test scripts in Robot Framework for UI and business logic layers.
- GUI test automation using Squish and maintaining automation suites.
- Integrating automated tests into CI/CD pipelines using Jenkins.
- Defect reporting and close collaboration with development teams.
- Working in Agile/Scrum teams ranging from 6 to 80 members.

6 years

Kongsberg Maritime Poland Sp. z o.o., System Engineer

June 2014 – Feb 2019

- Installation, configuration, and servicing of maritime navigation systems.
- Designing and executing manual test scenarios.
- Providing global technical support for maritime systems.
- Commissioning systems on newbuild vessels in international locations.
- Preparing technical documentation and customer support.
- Commissioning and testing integrated navigation systems (ECDIS, radar, autopilot, DP) on newbuild vessels at shipyards

4 years 9 months

Additional Professional Experience

Eurobank (Societe Generale Group) , Zone Manager	June 2007 – June 2014
AIG Bank , Zone Manager	June 2006 – June 2007
Telekomunikacja Polska S.A. (Orange) , Product Coordinator	May 2003 – June 2006
Polska Telefonia Cyfrowa Sp. z o.o. (T-Mobile) , Coordinator	Aug 2001 – May 2003
2SI S.A. , LAN Designer / Key Account Manager	Sept 1998 – Aug 2001
Unizeto Sp. z o.o. (Asseco) , LAN Designer / Key Account Manager	Dec 1995 – Sept 1998

Education

Master of Engineering	Szczecin University of Technology , Electronics and Telecommunications	Jan 1991 – Jan 1996
Electronic Technician	Technical Secondary School , Electronics and Automation	Jan 1986 – Jan 1991

Certifications

ISTQB Certified Tester Foundation Level (International Software Testing Qualifications Board)
Accredited Scrum Team Member (International Scrum Institute)
Maritime Certification in Navigation Equipment (Radar, GMDSS, AIS, VDR, etc.)
Python Programming and Test Automation Certificate

Interests

Electric unicycle, kitesurfing, skiing, snowboarding
